

- ^a Filter supports `Scan.setBatch()`, i.e., the scanner batch mode.
- ^b Filter can be used with the decorating `SkipFilter` class.
- ^c Filter can be used with the decorating `WhileMatchFilter` class.
- ^d Filter can be used with the combining `FilterList` class.
- ^e Filter has optimizations to stop a scan early, once there are no more matching rows ahead.
- ^f Filter can be usefully applied to `Get` instances.
- ^g Filter can be usefully applied to `Scan` instances.
- ^h Depends on the included filters.
