

Data Access Hitting a Wall

Current practice based on data download (FTP/GREP)

Will not scale to the datasets of tomorrow

- You can GREP 1 MB in a second
- You can GREP 1 GB in a minute
- You can GREP 1 TB in 2 days
- You can GREP 1 PB in 3 years.
- Oh!, and 1PB ~5,000 disks
- At some point you need **indices** to limit search
- **parallel** data search and analysis
- This is where databases can help
- You can FTP 1 MB in 1 sec
- You can FTP 1 GB / min (~1\$)
- ... 2 days and 1K\$
- ... 3 years and 1M\$
